Logging into your workstation:

Mac OS X is a multi-user operating system, which means that more than one user can use the computer. Every user has certain attributes: long name, short name, password and a home folder where all user files and preferences are stored.

All CAC Mac workstations currently have two accounts set up. One is for the use of the classroom teacher, and the other account is used by the technology service department for software problem solving.

Logging into your CAC Mac workstation:

1. Turn on your Mac
2. In the Name text box, type your username
3. In the Password text box, type your password
4. Click on Log In
